INTRODUCTION

CONGRATULATIONS!

You're now the proud owner of the Slate by iskn.

A pen-and-paper lover at heart, you can now write and draw with real pens and paper while instantly creating a ready-to-use digital file on your device. With the Slate, keep total control of your work and make your life easier: your creations are instantly digitized. Use the Imagink app to enhance your creations and share them with a single click.

Use this guide to learn about the Slate and start using its features in just a few minutes.

ESSENTIAL PACK CONTENTS

the Slate 2

¹LED steady: connection is established / LED breathing: searching for connection
²LED steady: battery is fully charged / LED breathing: charge in progress

BEFORE USING THE SLATE

CHARGE

The Slate's battery may be drained when you receive it. Charge your Slate before using it for the first time.

START CHARGING

Connect the Slate to your computer with the USB cable. The side LED lights up and blinks orange.

3 hours

FINISH CHARGING

The side LED shines orange continuously. Disconnect the USB cable.

Do not try to charge your Slate by plugging it to an AC adapter.

PRECAUTIONS FOR AN OPTIMAL PERFORMANCE

The Slate uses magnetic detection technology that requires certain conditions for optimal performance. The principal factors that can affect Slate's precision are:

- Magnetic objects such as telephones, speakers, motors, magnets, computers, or metal bars in the surrounding environment.
- WiFi or other Bluetooth radio signals that can interfere with the communication between the Slate and your iPad while using the Slate in Bluetooth mode.

For best results, just follow this rules when you start and use the Slate:

Place magnetic objects at least 25 centimeters / 10 inches away. (magnetic objects include telephones, speakers, motors, magnets, computers, metallic objects, iskn pens, etc).

Make also sure that you do not place the iskn pen or the ring you will use near the Slate when you turn it on, in order to not disturb its detection.

Do not place the Slate on a metal table or a table containing metal pieces.

Do not let the iskn pen or the ring over the Slate during a long time.

THE SLATE ON TABLET / MOBILE (IPAD / IPHONE)

INSTALLATION

Imagink

Download on the
App Store

Download the Imagink app
for iPad/iPhone on the
Apple® App Store.

CONNECTION

1

Activate the iPad or
iPhone's Bluetooth®.

2

Launch the Imagink app
downloaded from
the App Store.

3

Make sure to respect the
precautions described
page 5.

4

Turn on the Slate by making a long push on the power button at the top of the Slate in portrait mode (or at the left side in landscape mode).

5

Switch to the Bluetooth mode by making a short push on the Power button : a blue LED will shine at the top showing the Slate is ready to be used with your iPad or iPhone.

THE SLATE ON DESKTOP (PC / MAC)

INSTALLATION

Imagink

Get the Imagink app for your computer on www.iskn.co/download

Download and install the right version for your OS.

1

Plug your Slate to your computer thanks to the USB cord included.

2

Launch the Imagink app downloaded from the iskn website.

3

Make sure to respect the precautions described page 5.

4

Turn on the Slate by making a long push on the power button at the top of the Slate in portrait mode (or at the left side in landscape mode).

5

The Slate will automatically start in the USB connection mode: a white LED will shine showing you the Slate is ready to be used with your computer and a notification will appear on your screen.

CONNECTION

ESSENTIAL INFORMATIONS

With the Slate, you can write on a single sheet of paper or a notebook (up to 1.5 centimeters | 3/4 inch thick).

For an optimal experience, make sure that your paper or notebook does not contain metal parts (spiral binding, etc.).

If you draw on a notebook (compatible with the Slate through 1,5 cm thickness | 0,6 inch), you must use the iskn pen for a better performance.

From 0 to 5,5 cm
From 0 to 2 ³/₄ in

From 0 to 1,5 cm
From 0 to 2 ³/₄ in
Contact zone with the writing surface

Front LED 

ESSENTIAL INFORMATIONS

Tilt your pen at an angle greater than 10 degrees to the Slate's surface.

Place the sheet of paper or notebook on the Slate between the area limit points.

Do not move the sheet of paper or notebook while using the Slate.

HOW TO USE THE CLIPS

1

Position your sheet, then fasten the Clips to the edge of your Slate.

2

To remove them, simply press on the back of the Clips.

HOW TO PLACE THE RING

Besides the iskn pen, the Essential Pack includes a drawing pencil with a ring. This ring is designed to make your drawing tools compatible with the Slate : it will fit several kinds of pencils, as they are cylindrical or hexagonal like colored pencil, thanks to its silicone support with rubber strips into it.

This Ring fits all pencils until:

- 7,4 mm | 2,9 inches for cylindrical pencils
- 7,2 mm for | 2,8 inches for hexagonal pencils

The iskn ring is designed to work efficiently on a sheet of paper over your Slate. If you draw on a notebook (compatible with the Slate through 1,5 cm thickness | 0,6 inch), you must use the iskn pen for a better performance.

To place the Ring on your own drawing tool:

1

Squeeze the adapter of your choice (S or M) into a heart shape to insert it into the Ring.

2

Slide the Ring onto a compatible drawing tool¹.

¹List of compatible tools on iskn.co

3

Adjust the ring to be around 4 cm from the pen tip, by comparing with the iskn pen.

4

Adjust the magnet so it is perpendicular to your pen/pencil.

STAND ALONE MODE

Screenless mode allows you to use the Slate independently of your iPad, PC or Mac. The Slate contains a battery and a 8Go memory so that you can take the Slate with you wherever you go.

In screenless mode, your strokes are digitized as a black ballpoint pen. Later, you can transfer your drawings to the Imagink app via Bluetooth or USB.

1

Turn on your Slate : by making a long push on the power button at the top of the Slate in portrait mode (or at the left side in landscape mode). Your Slate will start in USB mode with the LED white shining.

2

Switch on the screenless mode : by making two short pushes to when the Slate is in Screenless mode, the upper LED shines green and your Slate is ready for use without your iPad, Mac, or PC.
